Reduce reimbursement time and optimise cash flow management with Expense Pay

What does it cost your organisation to generate an expense reimbursement or corporate card payment? Probably more than you think.

With a manual process, it can take on average 10 days to process a reimbursement—costing valuable time and effort from your team. Why not automate this tedious process to streamline the procurement pay cycle?

Expense Pay from Concur automatically settles corporate cards and reimburses employees, enabling your team to focus on driving growth, not processing paper. By integrating the entire process—from procurement through payment—your organisation can finally take complete control.
